

Publicizing the Biggest Financial Fraud Racket of Century Staring Interconnected Banks' Cartel and Donald Trump

Part 1: Why Trump Life Depends on Winning 2024 Election

My name is Arash Shahriari, and the date of recording of this video is September 23, 2024. In this video , I will expose a conspiracy to subvert America. This plot is contrived by a group of accomplice politicians. I have never seen a government individual or politician dare to publicize this plot, even though many of them are fully aware of it. Therefore, If something happens to me after the publication of this video, I want you to know that it was NOT an accidental matter. Today, this plot has reached the point of fulfillment and its clock is ticking. All the sources of this video are in the description and the complete transcript article of this video can be found on my website presidentarash.com

My goal of making this video is to make you understand how the politicians are using artificial economic tools to amass a fortune that gives them unchecked power, in exchange for destitution of the masses of American people. In the first part I will explain the function of this grande financial fraud racket, and in the second part I will use that knowledge to prove to you that everything Donald Trump has planned on, comes like perfect pieces of puzzle together to subvert the US and declare himself the new king supported by an army of his ultra rich conspirators. Donald Trump is a criminal who should had been stopped many years ago, but by bullying his way to the top by simply borrowing and borrowing more, now unfortunately has all the economic and personal motives to subvert America for a creation of a NEW United Kingdoms of America.

Donald Trump Life and family assets are so much at risk, that he would do anything to win the 2024 election to get rid of the international banks to whom he owes billions of dollars. If you think the January 6th insurrection was bad, you are in for a serious surprise. Those banks will cut him into pieces if he does not pay them back, and therefore Trump will do anything including cutting Americans into pieces just like he did during his Covid-19 term in office.

The plot is to squeeze the economy to the point of collapse so that they can exert themselves as the Lords overseeing different kingdoms in the New United Kingdoms of America. Before I start , I have tried to lay out my case in the most plain way, but, if you get confused, please repeat watching the video for further understanding. For those Trump supporters, I warn you, this election is not like any other election. The American empire has come to its end, and by voting for him, you are helping him deliver the final blow as well as signing your own execution order along with that of everybody else. I highly encourage you not to play

the game of ego, and vote for him, just to spite the democrats or your neighbor who votes for them.

Part 2: Explaining the Biggest Financial Fraud Racket of the Century:

Section 1: Three Elements of Racket: How Does National Debt Money Make Its Way to Economy?

3 Accomplices of Biggest Financial Fraud

Photos used from Shutterstock.com

Like any machinery, the elements of this mega-scale financial racket are rather simple:

1. Foreign Nations, mainly China and Japan as Lenders
2. Two, US Government as Lendee, and
3. Three Exclusive Private Club of 24 or so Mega Large Banks acting as intermediary dealers of transferring Foreign Funds into the society.

Process of Financials Racket

1. **Foreign Nations** offer their funds for sale to the US Government at the Compounded Interest rate of 3.33%.¹
2. **Creation of money**
 - a) The US Government authorizes borrowing Foreign Nations funds.
 - b) Upon the Receipt, the government auctions off the borrowed funds with the issuance of artificial papers called Treasury bonds At Fixed Rate of 3.875% as of September 2024. ² Treasury bonds are essentially gigantic versions of the same dollar bills in your pocket.
 - c) An exclusive cartel of 24 mega large banks, including foreign notoriously infamous banks such Deutsche Bank, HSBC, Société Générale have the exclusive right to enter this auction . The banks bid on the treasury bonds,³ by offering a reasonable price in order to have them. In this transaction essentially they exchange dollar for dollar.
3. **Predatory Lending:** Once these exclusive privileged cartel of banks have the funds, now they can loan at the compounded rate above the federal rate of 4.75%.⁴ Essentially, this is a game we call arbitrage, borrowing on 1 segregated financial markets, and selling in another segregated market for a gain. Treasury bonds are fraudulent schemes, because The US government borrows ironically at a higher rate from China, yet offers it at a discount to the bank. The deficit created essentially would be taxpayers' liability to pay.

Section 2: Explanation of the Destructive Impacts of National Debt Fraud Racket

Impact 1: Compounding Interest Alone Burden on American Citizens

In 2024, only the interest portion of national debt was \$658 billion dollars. The Congressional Budget Office projects that interest rises rapidly over the next decade, reaching \$1 trillion in 2025 and \$1.7 trillion in 2034.

¹ "Fiscal Data Explains the National Debt," n.d.

<https://www.cnn.com/cnn-underscored/money/federal-funds-rate/#:~:text=The%20current%20federal%20funds%20rate,Colmar%20said%20of%20the%20Fed.>

While in his 2016 election campaign, Donald Trump promised to eliminate the entire national debt, yet within his first 3 years pre-Covid-19 time in office, national debt increased by **\$4 trillion dollars.**

Sweet feeling of getting stimulus checks and loans and taking the money and depositing it into the bank, and buying stuff from corporations like Walmart that stayed open while small shops were closed, and simply said, enriching the corporations further.

Today, the daily interest only portion of debt **is \$3 billions a day,**⁵ thanks to the compounding effect of the increase that Trump led. Essentially Trump now wants to fix the problem he caused in the first place.

Impact 2: Per American Citizen's Share of national Debt

By the 2020 end quarter National Debt was 28428000000⁶ which divided for US population of 320000000 equals Per person to **\$88,8375**

Post Covid-19, Donald Trump added another \$4.8 trillion increase on covid-19 free loan that went back to the pocket of banks, through the multiplying lens of the same fractional lending scheme. Taking free money from debt and giving it to people to make them happy.

The result right now per person , adult or child, or toddler. is \$104,866. I can't afford it.

Impact 3: Predatory Lending Marriage with Fractional Lending, and Circular ownership: A Loan Racket So Good that Does Miracle even if you don't pay it back

By this time, you may ask, so what is wrong with that? Banks are simply using the money they already have to purchase money, and although they are clearly abusing the economy by engaging in the arbitrage of lower interest rate funds from the government, and lending to others, yet it seems like a business plan, and this is a fair game, right?

This is where we get to the bone of this filthy rottened racket. Let me introduce to you a little thing called lending through Fractional Reserve banking. In order for you to understand the devastation of this concept, I want you to watch this clip that explains it so well.⁷

So essentially these banks create exponential amounts of money out of thin air.

⁵ "Yahoo Is Part of the Yahoo Family of Brands," n.d., <https://finance.yahoo.com/news/u-debt-massive-interest-costs-183555774.html>.

⁶ "US Debt by President | Chart & per President Deficit | Self.," February 6, 2024. <https://www.self.inc/info/us-debt-by-president/>.

⁷ "Unlocking the Secrets Fractional Reserve Banking: A Simple Explanation," March 4, 2024, accessed September 23, 2024, https://youtube.com/shorts/8Qo4qZ_f-wc?feature=shared.

So these Banks use the funds they received through excessive borrowing and fractional lending to purchase treasury bonds. Once this is done they can repeat the cycle. Simply they take the money and they will start lending it out and on a fractional blending basis, they continue building more and more wealth while you as a troubled ordinary person have no way out. As you are receiving the funds. you're actually thinking that what a cool guy I am; I'm able to pull off the scheme and you know, take out essentially a free loan from the government without having to even pay back because I'm obviously not able to pay it back, not knowing you are signing your own death sentence. People love free money. So they have created the free money in a corrupt way while shackling you to poverty.

Predatory Lending which is the process of giving loans without assessing the individual's ability to repay, coupled with Fractional Lending is such a genius fraud by the US government that the only important task required for it to work, is for individuals to keep borrowing. Paying back is just not a problem.

2008 Predatory Lending Market Crash

In 2008, through the marriage of Predatory lending and Fractional-Reserve Lending, The United States economy suffered so badly in the aftermath of 2008 that ever since then the US economy is on life support. Given how This market crash paralyzed Americans, one would think that regulations and oversight would be established to prevent the repeat of it.

Covid-19 Predatory Lending Market Crash

When the covid happened,,, and the government started giving out PayCheck Protection forgivable loans out to people, I was asking myself, if they give people free grant money, why do they call it a loan?

Understanding Circular ownership

Essentially circular ownership means the big cartel of banks whose privileged members feed off of one another by engaging in a series of schemes of another's success while blurring the line of their own profit, even if one another fails in the short term. This is accomplished by fixing their financial missions with each other, and as one giant beast in a predatory way eliminates any threat to themselves. This circular ownership is not legal in Europe but for some reason it is legal in the US.

Bail Out in the Event of a Large Borrower Running out of Funds to Keep Borrowing

And in the event a large borrower runs out fund, government of Bail out is made using your tax money which further causes your paycheck

Essentially the banks, using the 10 percent- reserve rule , create money out thin air that through recent mergers of large banks is only available to them and they feed on another in a circular way as they hold large stocks of ownership in one another's corporation.

The government is daring to scrutinize them as we saw in 2008 and as now with the elimination of the federal reserve by 10 percent in March 2020. I think the next step is just simply to give the banks free money. Surprise for you, we are already doing it. When you as a simple ordinary person end up losing your job and quitting because of a butt hole boss, people blame you and bash you as an a failure an a disgrace, but when banks with all those well dressed top notch army of confident financial advisors fail, then that is perfectly normal because uncle sam happily bails you out? Don't you see what is happening in America , Wake up people? The only solution is to take the advancements in our new era and blend them with the golden societies of the past. We should go back to communal lands, which were destroyed by the series of enclosure acts which literally in daylight kicked peasants out of communal lands so they could seize it and sell it back to them for rent. Essentially the lords understood that there is a shift coming and they are not going to need people anymore to do agriculture and factories are the future, . what have we done to ourselves , that not only we do not see fault with that , but we praise ourselves for such atrocity

The main issue here is that in any financial ecosystem, resources are limited and the massive concentration of wealth in the hands of a few means devastation for others, leading to an entire nation's collapse. Today, in America many people can not meet their basic necessities while two third of Americans say they do not have a mere \$400 savings in their accounts to cover an emergency. This is a crisis that is going unnoticed and Donald Trump 2017 Tax Cut is responsible as he reduced the corporate tax rate from 35 percent to 21 percent, leaving substantial more money from corporations to engage in stock buybacks and raise in the CEO price.

Stock buybacks which historically have been illegal in the US but became legal again in 1982, is a method for a corporation to artificially increase its share value and attract more investors without actually delivering any practical improvement. Essentially, under this scheme corporations buy back their own shares in the marketplace. For example, let's say, a corporation has 100 shares priced at \$1 dollar, totalling \$100,. if it manages to buy back half of its share, now the price of its share in exchange becomes \$2 which in the eye of investors reflects a 200 percent increase in their investment.

Or take the case of Mcdonalds. In the last year or so many of the Mcdonald's menu items increased, which coincidentally was coupled with an 8 percent increase in the already high salary of Mcdonalds totalling **\$19.2 million dollars.**⁸

⁸ Maze, Jonathan. "McDonald'S CEO Chris Kempczinski Got a Raise Last Year." Restaurant Business, April 3, 2024.

<https://www.restaurantbusinessonline.com/financing/mcdonalds-ceo-chris-kempczinski-got-raise-last-year>.

It should be clearly understood that lowering taxes for corporations, which is known to trickle down the economy, has been studied years and after year and two professors of economics in London School of Business compiled imperial data over 50 years , clearly debunking the positive impact of trick down economy.

Impact 4: Wielding of Economic Power in Hands of a Few Individuals

Thanks to Trump’s 2017 Tax, coupled with the Fractional-Reserve Lending Racket, today about 800 single individuals own more than half of the entire wealth of our nation ^{9 10} while the remaining 333 million people own less than half.

Number of billionaires in the United States from 1990 to 2023

To measure the alarming level of income inequality which can cause civil unrest and revolutionary rebellions for masses who are seeking a better life, economists use a measure called Gini coefficient. If an economy has a complete income equality, this coefficient would be 0, while a completely unequal and volatile economy would have a coefficient of 1.¹² Today in America, the Gini Coefficient stands at 0.47,¹³ reflecting a very volatile civil

stance. Mr Trump Solution for suppressing this volatility is to put the discontent protestors under the label of mentally ill into permanent asylum houses.¹⁴

Historical Parallels of Predatory Lending: Case of US Banks vs Post World War One Germany

So a long time ago, we actually pulled off the same scheme on Germany through the same exact concept as loaning JP Morgan and many large financiers started funneling a ton of money to Germany by the label of a Goodwill that they wanted to help Germany paint. It's War reparation death under such a label. They funneled humongous tons of money to Germany under this plan. German economy was given so much liquidity while all the interconnected banks in these transactions were getting richer and richer it is no wonder

Section 3: Proof of Financials Rack Evident by Exponential Income Inequality in the Recent US History

When someone, including me, throws numbers at you, you need to be careful and think critically. Accordingly, here I want to lay out some of the variables that we should also take into consideration when analyzing the income inequality in America. First is the size of GDP. Now ideally, if the economy expands at the same pace as the growth in the number of millionaires, and billionaires, we should ideally be fine. But when we look at the chart of growth in GDP from 1990 to 2022, the GDP has only expanded by 2.18 fold.¹⁵ What is devastating is that while GDP has grown by 2.18 fold, looking at the percentage of people below poverty line, we see that poverty has stayed about the same, meaning our economists have not lifted people out of poverty by the notion of economic prosperity.¹⁶

Part 4: Connecting the Dots; Trump, the Connection Point of the Biggest Financial Fraud Racket

Section 1: Why is Returning Laundered Money to Its Origins Important?

Through fractional lending, money supply increases exponentially which is a very bad thing. It creates a disparity between supply of money and output production, ultimately causing severe inflation, and loss of US Dollar perceived value, as well as the reduction of the real value of their corporate shares. Banks need to export the excess funds out of the US economy to maintain balance. They do this thru numerous ways such as

1. Giving Dividends to their off-shore subsidiaries or other shareholder banks
2. Invest enormous amount of obsolete funds into tangible assets such as real estate and valuables such as gold within the US and internationally

And Finally, Banks also exit money out of the US economy in order so that they can start the same process over and over in an infinite cycle until they own the entire global assets.

Cycle of Money Laundering Racket

Photos used from Shutterstock.com

Section 1: Why Did Trump Get Engaged in Global Money Laundering?

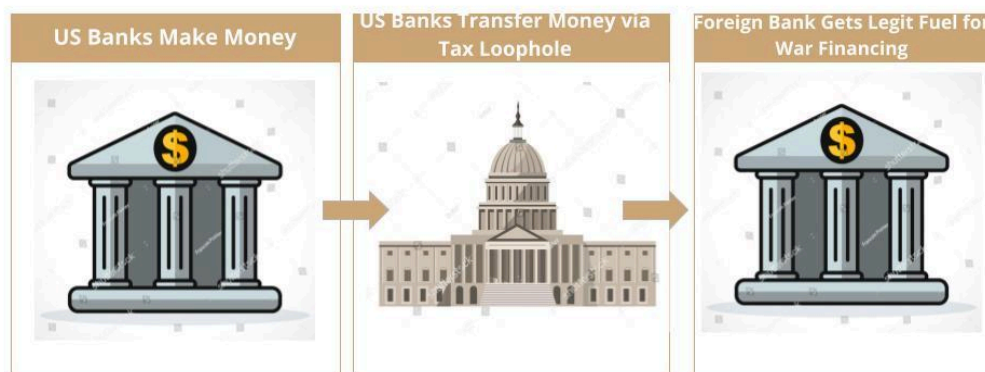

Contrary to popular belief, during the 1980s and 1990s, Trump suffered a series of devastating business failures back to back. By 2004, Trump's real estate empire came to the verge of collapse after he filed for 6 bankruptcies, and 13 of his businesses failed. He initially did play with self-promotion schemes by selling his name to luxury real estate projects, appealing in Pizza Hut and McDonalds ads, But that did not cut it for him. Donald Trump by this date, had accumulated debt of almost \$2 billion, and Trump decided to save his career by launching himself in global money laundering rackets.

Section 1: Methods Trump has Engaged in Global Financial Racket Fraud Racket Cycle

Step 1: Legal Facilitation and Incentives for the Return Movement of Laundered Money

As a provision of 2017 Tax Cut, Corporations can deduct from %50 to %100 of the value of dividends paid to their foreign affiliates and shareholders. I know that there are a lot of technicalities involved here in understanding how this single change in taxation can benefit the money Laundering Racket.. Let me use an example; as we mentioned a lot of these banks have a circular ownership in one another, meaning Duete Bank for example owns a large amount of shares of Bank of America. When Bank of America wants to pay Deutsche Bank, they will use this rule to transfer as much as money they want legally to the Deutsche Bank without being concerned about paying taxes on that. So essentially while Bank of America is subject to US sanction regulations, it can pass the money to Deutsche Bank which has a freedom of operation without close scrutiny of US sanction laws. Giving full incentives to refuel and repeat the cycle of money laundering to conglomerate networks of their foreign banks.^{17 18}

Cycle of Transferring Profits Back to Money Launderers

<https://www.thetaxadviser.com/issues/2023/aug/passthrough-entity-treatment-of-foreign-subsubsidiary-income.html>.

Step 2: Authorizing Massive Borrowing Scheme

Donald Trump because during his presidency while he also caused the claim of Life of many hundreds of thousands of the Americans as we had the highest rate and ratio of the deaths among all nations surprisingly enough you mean that we had to hold up the virus vaccine yet again, but because he gave a lot of goodies such as checks after stealing and taking free money from the national debt. He calls the 44% increase in national debt while he promised that he would eliminate National death in his campaign. He used that money essentially to drive you and play with your monkey brain. Obviously, you don't hold him viable for all the genocide that he committed while being a president why keep ignoring the growth of the virus keeps saying that Colby is going to away but somehow your monkey brain loves the fact that he gave a lot of rounds of

Almost 4 trillion increase pre covid while he promised to eliminate it
And another 4.8 trillion increase on covid free money that went back to pocket of
The man launders around the blood of childrens who are killed by russia, Iran around the world. You honestly think a man capable of this moral depravity would think twice about cutting you into pieces? Have you forgotten his silence when the Saudis cut into pieces the body of Washington Post reporter Jamal kashikchi? He just stayed silent and as a gift for his service, Saudis sent him a gift of \$2 billion dollars.

The man launders around the blood of childrens who are killed by russia, Iran around the world. When the Saudis cut into pieces the body of Washington Post reporter Jamal kashikchi, He just stayed silent and as a gift for his service, Saudis sent him a gift of \$2 billion dollars.

Step 3: Trump New Venture of Foreign Money Laundering from Major Hubs such as Iran, Russia, and Colombian Drug Cartels

Contrary to popular belief, during the 1980s and 1990s, Trump suffered a series of devastating business failures back to back. By 2004, Trump's real estate empire came to the verge of collapse after he filed for 6 bankruptcies, and 13 of his businesses failed. He initially did play with self-promotion schemes by selling his name to luxury real estate projects, appealing in Pizza Hut and McDonalds ads, But that did not cut it for him. Donald Trump by this date, had accumulated debt of almost \$2 billion, and Trump decided to save his career by launching himself in global money laundering rackets.

Laundered Money Iranian Regime Case

In 2017 *New Yorker* reported the Trump Organization signed contracts in 2012 with developers to build a skyscraper in Azerbaijan that appeared “to be a corrupt operation engineered by oligarchs tied to Iran’s Revolutionary Guard”.

Azerbaijan is one of the most corrupt countries on Earth., and Trump's Conglomerate Organization had the expertise to beware of this. Yet Trump's undecided to partner in building the skyscraper with the Mammadovs, whose billionaire patriarch is Ziya Mammadov. In 2008, Mr Mammadov awarded a series of multimillion-pound contracts to an Iranian construction firm allegedly controlled by the IRGC as part of a larger scheme to export money from Iran in order to fund terror and other activities abroad. The company was run by the Darvishi family, at least three members of whom were associated with the IRGC, the *New Yorker* reported.^{19 20}

Laundered Money Russia Case

In 2009, Donald Trump defaulted on a massive **\$640 million dollar** loan from Deutsche Bank, yet surprisingly, Deutsche Bank continued lending money in the total of **\$2.5 billion dollars**. The incoming loans continued until 2015, at which point Deutsche bank came under department of justice scrutiny for laundering money from the Russian sources close to Putin and Kremlin²¹, and the bank was implicated in a **\$10 Billion Dollar** Russian money-laundering scheme; Deutsche Bank later signed a consent order and agreed to pay \$630 million in fines.²²

Additionally in 2015, the Department of Justice sued Trump for money laundering and Trump's Atlantic City casinos paid \$10 million in fines. The Trump SoHo project also seems

to have been a front for money laundering, though Trump himself evades legal liability for that one on the grounds that he didn't actually own the project.²³

The Blabbering Mouth Brothers

Both of Trump's sons have made explicit comments referring to Russia as the source of their money.

In September 2008, at the "Bridging U.S. and Emerging Markets Real Estate" conference in New York, Donald Trump Jr., said: "In terms of high-end product influx into the United States, Russians make up a pretty disproportionate cross-section of a lot of our assets. Say, in Dubai, and certainly with our project in SoHo, and anywhere in New York. We see a lot of money pouring in from Russia."

In 2014, his younger brother Eric—also an executive in the Trump Organization—told a well-known sports writer, James Dodson, after the latter asked him where the organization was getting the money to buy up so many golf courses: "Well, we don't rely on American banks. We have all the funding we need out of Russia." (In 2017, after the Mueller investigation began, Eric Trump denied making the comment.)²⁴

Laundered Money Colombian Cartel Case

David Helmut Murcia Guzmán is a Colombian fraudster and money launderer with reported ties to armed groups. He ran a profitable pyramid scheme in Colombia named after his initials, DMG Group (DMG), and was a magnet for illicit funds. According to the U.S. Attorney for the Southern District of New York, "Murcia Guzmán... laundered narcotics proceeds through "...an intricate web of deception across continents to disguise his dirty drug money and support his lavish lifestyle."

David Murcia Guzmán laundered millions of dollars of drug money through purchasing real estate from the Trump Organization Company. Trump as licensor was almost certainly entitled to call for sales information.²⁵

Part 5: Committed Resort to an All-Out Battle to Seize Political Immunity to Escape Financials , Tax Evasion²⁶, and Rape Convictions

Given the degree and number of his involvements which could jeopardize his family and wealth, no wonder the man has gone insane and is committing himself to any scheme including a coup to take over America. anything he can to get to power . Our secret service has literally turned into his private toys to stage acts of coup and plot his own fake assisisation twice.

Section 1: Radical Promises and Claims to the Extent of Messianic Level

Donald Trump's way out of trouble is just gaining political immunity. His only way out is to gamble with the prospects of taking the power and reversing the damage including pardoning himself. Washington Post Reported that During his term in the office alone he lied more than 30500 times. ²⁷ Oh dear

- a) Threatening to Punish Legislatures to Punish with securing him Votes
- b) Claiming to be the Messiah, and People's Retribution. The fact that Trump pulls religion into politics just shows how desperate he is and diminishes his credibility. He has no other card to use.
- c) Telling Christian they Never Have to Vote Again After His Election²⁸
- d) Terminating the Constitution²⁹
- e) Claiming Immigrants are Eating Cats and Dogs.
- f) Using navy seal to capture political dissidents, and putting them into jail
- g) Dismantling the Constitution
- h) Making empty promises of eliminating payroll taxes, tax on over-time, and income tax completely.

Section 2: Let's Discuss Destructive Impacts of Trump's Tax Policy

In spite of his outrageous out-of-the-world lies, I am going to devote the rest of this paper to address what is my expertise and that is taxes and their economic aspect is the economic aspect of taxes.

Just a quick note. Where are you going to get Revenue to support all the Civil infrastructures in many elements that need to run the society. I think people are experiencing some delusion essentially and they don't understand it becomes so selfish that they just think that they can cross all the borders and boundaries to get what they want. That is even bringing some putting power that dick says to the Congress and removes the power to collect the money that can be used to everybody's welfare including their own Social Security retirement accounts.

Ideally if the tax on the corporation was rather increased while people did not have to pay taxes, maybe this would have vertically made some sense. But Trump wants to even further reduce corporate taxes from **%21 to %15**

Eliminating Payroll Tax

Payroll Taxes are essentially social security taxes for the disabled Individuals and retirees who reach the age of 67. According to the Social Security Administration, 1 in 4 individuals become disabled before the age of 25,³⁰ meaning your chances of becoming disabled while you are young hopeful is in %25. Also when you turn 67 and are no longer able to work, you can collect retirement benefits from the payroll taxes you paid into the system. of that. Also, once you reach the age of 67, everything starts aching, and under social security benefits, you get a generous government insurance called Medicare that covers most doctors, hospitals, and medicines. Chances are once you reach that age, you will be the first one trying to cut through the lines of the Social Security office to get your benefit first..

Unlike you, Donald Trump is 78 years old. He's speaking for himself. He has stolen the wages of the people to the extent that he doesn't need to rely on Social Security. That is why he's speaking for himself and he wants to cut the Social Security tax

Eliminating Income Tax

So he doesn't even have to pay any income tax on all the taxes. He has cheated because he knows how much he owes the federal government.³¹ That is what he wants to cost the taxes out. He's not thinking about you waking up, you dumbass.

³⁰ "Facts | the Faces and Facts of Disability | SSA," n.d.
<https://www.ssa.gov/disabilityfacts/facts.html>.

<https://www.nytimes.com/interactive/2018/10/02/us/politics/donald-trump-tax-schemes-fr-ed-trump.html>.

You know something that Hitler learned very well was that propaganda and the movie industry are very important, essentially using some fake stuff to try to display your power.

Eliminating Overtime Tax

Now, I am not sure why he even brings the Overtime Tax up because he already has said that he wants to eliminate income tax. But irrespective of that, Trump ran on the platform of illegal immigrants stealing job opportunities from Americans. With elimination of overtime Tax, you are essentially incentivising individuals to work more hours which leaves less work hours available for others to pick up.

Going ALL TARIFFS to Make Up for the TAX REVENUE LOSS

Point 1: What are Tariffs?

Tariffs are essentially a forceful way for an importing country to demand tolls from a foreign exporting country's interest to allow it the right of passage to sell its goods and services in its domestic market. The most terrible aspect of tariffs is that , although initially the exporting country wishing to enter the domestic market pays the prices, but ultimately once entered in, the foreign country will adjust its price to reflect the cost of tariffs, and therefore the people would ultimately pay back the cost of the tariffs.

Point 2: Tariffs Could be Good Only in the Case of Developing Poor Nations

I will just start off by giving the benefit of Doubt to Trump and that is tariffs. When a society is in this developmental phase, it has an abundant amount of raw resources and abundant amounts of cheap labor available to it. Imposing tariffs and injecting capital into the domestic economy will push the domestic segment to start developing itself and this is doable because the prices of domestically produced goods would be cheaper compared to that of developed exporters. So, again when a society is either in a developmental phase in a particular area or just in general it would make sense to employ tariffs to try to upset any foreign competition.. It's a sad story to say, but in our current world, those countries that are in a developing phase like African nations or South American nations can benefit from imposing tariffs.

Point 3: Tariffs Do NOT WORK in Developed Nations Life US

Issues 1: In any other scenario other than developing countries, Number one, although the foreign country has to pay the extra price, but nonetheless the consumer who doesn't have any alternative choice in purchasing is still willing to take on the payment for tariffs, because even after tariffs the goods of the foreign country would end up being cheaper. After enactment of Trump tariffs on China, U.S. Farm Bankruptcies Surged 24% , and Farmers became increasingly dependent on federal aid, crop insurance Bankruptcies rise to highest since 2011, farm group says³²

³² Doring, Mike, Bloomberg - "U.S. Farm Bankruptcies Surge 24% on Strain From Trump Trade War" October 30, 2019.

Issues 2: Further imposing tariffs, would lead to tariffs wars. You definitely don't want to do that with the biggest guy on the block which happens to be China. Why?? because China can also raise prices on a lot of Commodities that it sells. The United States and the United States truly depend on them. Essentially you are giving them discretion to cut you off from the global supply given that China has obtained the Monopoly over the global Supply of labor and resources.

Issues 3: The third reason why you don't want to engage in tariffs with China is because China has secured for itself the exclusive access to global supply of labor and resources. You might have heard in the last few years that China has been engaged on This Global initiative called Building Bridges and Roads Initiative³³ That essentially is a pathway for China to secure suppliers around the globe to feed its massive gigantic production factory of creatine supplies for the rest of the world. What does that mean? That means that if you want to launch an operation on a scale of that of China so you can compete with China you need to have a large amount of suppliers. What has China done is that it has security suppliers on an exclusive basis for itself. So all the doors and routes are close to the American companies who want to compete in that particular sector of consumer goods with China.

Issue 4: The fourth reason that totally reports Trump's way of wanting to approach the tariffs is that if even if we were to engage in such a large supply chain of the goods and the labor to try to compete with China that means that we have to employ as many as possible immigrants that we can't especially illegally immigrants to try to stay competitive given that illegal immigrants work with for lower wages and were terrible conditions willingly just so they can feed themselves. His policy is to get rid of the immigrants implementing this policy ultimately means cutting the supplies of everybody and essentially pushing people to hunger and destitution and dying from malnutrition. This is what it means. What is going to follow is social unrest, civil unrest and Chaos which that does give to Mr. Trump. It will allow him to declare emergency power for himself on an ongoing basis so he can stay in power till he dies.

We're trying to apply for social services for gold saw and they want from us a doctor's notice explaining that good suffers from it type of diagnosis of autism or anything that you believe that she has.

<https://www.bloomberg.com/news/articles/2019-10-30/u-s-farm-bankruptcies-surge-24-on-strain-from-trump-trade-war>.

³³ McBride, James. "China's Massive Belt and Road Initiative." *Council on Foreign Relations*, February 3, 2023.

<https://www.cfr.org/backgrounders/chinas-massive-belt-and-road-initiative>.

We're trying to apply for Social Services benefits for her and they asked us to provide a doctor's notice to support our application and she was previously seen by doctors who diagnosed her with a type of autism, but we need a new diagnosis that is current. Would you be able to write a note of diagnosis of her?

And this brings me to my third reason why you don't want to engage in tariff in this era as we speak today. You might have heard in the last few years that China has been engaged on This Global initiative called **Belt and Road Initiative** which is essentially a pathway for China to secure suppliers around the globe to feed its massive gigantic production factory which feeds the entire world. What does that mean? That means that if you want to launch an operation on a scale of that of China so you can compete with China you need to have a large amount of supply of labor and resources. So all the African, and Asian doors and routes are close to the American companies who want to compete in that particular sector of consumer goods with China. If hypothetically

US were to engage in such a massive endeavor supply chain of the goods and the labor to try to compete with China that means that we have to employ as many as possible immigrants that we can especially latin america immigrants, as the only source untouched territory for china, and we must shamefully continue exploiting the labor of illegal immigrants who work for lower wages in addition to terrible conditions willingly just so they can feed themselves.

Under His policy to get rid of the immigrants, implementing this policy ultimately means cutting the supplies of everybody and essentially pushing American people to starvation and destitution as they struggle to meet their basic needs. Starvation and Destitute is going to lead to civil unrest, and Chaos which that does give to Mr. Trump has the excuse to overthrow the Congress, and Judiciary and declare emergency power for himself on an ongoing basis so he can stay in power till he dies.

Point 4: Two Repeated Lessons from the US History

Twice in US history, the All-Tariffs scheme was employed and both times it led to Devastation for this country. First episode was In 1800s, when the northern US states emerged as primarily Financial sectors. In the 1850s, the US went on an all-tariffs regime which led the US to essentially default on its Revenue to the point of wanting to go after the South that had an egalitarian society and was untouched from this trauma. the Southern US states the bankruptcy and intent of Northern States and broke off from the eternal union. Therefore, the inane all-Tariffs policy caused the single gravest civil tragedy within America without any foreign intervention, and you can try you chance to let that happen again

Finally the US came to his senses and started adopting an income tax in 1913 to try to balance its budgets and actually ended up having a budget surplus.

The second round when All-tariffs were employed , was in the 1920s, which also led to another grave tragedy called the Great Depression. Hoover against all its advisors went on to adopt the all-tariffs regime and massively slash the corporate taxes., .

Part 6: Conclusion

Despite all financial hardships, The United States currently is experiencing the very phase the 1900s Germany experienced. Like Germany of that era, a thriving environment of freedom of expression has caused the explosion of information globally. People in America are now more aware of what is happening on both sides of their Borders

Mega-rich Beneficiaries of many of the global frauds of large banks and corporations live in the US, and are worried people's knowledge would lead to their prosecution and trials, and ending up behind bars in jail.

If you are Republican, I do not blame you. Democrats and republicans are both guilty of the same crimes as we will discover in this paper. The part that you are wrong is to not understand that they are both wrong. Democrats and republicans are two sides of the same coin with a small caveat who use the make-shift 4-year presidential term to legally commit wrong-doings in an organized cartel. This needs no more proof when During Trump's term, in two rounds of impeachments, the very democrats in Congress fearing Trump, did not even secure enough votes to successfully depose him of power. Many democrats and republicans in hope of securing a spot for their own self interest have been leading the events for his assumption of power. The reason for that is that they have noticed an unprecedented amount of support for Trump. Carnegie Mellon , the grandson of Andrew Carnegei , one of the most infamous Robber Barons of America gave the Trump Campaign the single largest donations in US history , a whopping single **\$50 million dollar**. They know that people like Carnegeis family only give money away in pursuit of hefty return on their investment

American people are once again left on their own to democratically and peacefully resolve the matter before it is too late. It is once again upon the very you, the people with large numbers who can reverse this course. At this point anybody other than the old man, be a better candidate for the US future.

America today is facing the same circumstances that Germany experienced after WW1. If they had been patient and preferred poverty, devastation would have stayed out the bay. Choosing between democrats and republicans today is respectively is like choosing between poverty

Electing Democrats will avert the disaster for now, giving us 4 years extra years to plan a strong rehaul.

You and I essentially have to walk all the way down to the border of Mexico or to Canada begging these countries to let us in just so we can have food and we can eat you're such an idiot. You're falling for the Trump scheme after even hearing and all this stuff.

Trump Housing bill caused loss of homes and emergence of airbnb and corporate owners³⁴
Democrats in Congress have introduced a bill in both houses of Congress on Tuesday to ban hedge funds from buying and owning single-family homes in the United States.
